Chronic procrastination can indeed be a sign of something more serious. If "Tired of Waiting" does in fact suffer from ADHD, consulting a clinician is a crucial first step.

Normal brains are constantly ignoring small prediction errors and are very tolerant of ambiguous, uncertain, or new situations. An ASD brain cannot blend in the minor mistakes as well, so it spends a lifetime perpetually surprised and overstimulated by every event that is even slightly unpredictable, and is fairly intolerant of ambiguous, uncertain, or new...

The difficulty with breaking the addiction to procrastination in particular is that there is an infinite number of potential substitute actions that would still be forms of procrastination, Dr.

Don't be afraid to let family and friends know that you are experiencing avolition and that it is not procrastination nor laziness. Consider enlisting their help by asking them to help you create a schedule for medications, therapy, bill paying, appointments, or any other regular activities.

Give laziness and procrastination a chance! This may sound crazy, but as I share in my book, IN/ACTION: Rethinking the Path to Results, there is a huge advantage in delegating or
